- Developed skills as a team lead
- Oversaw student pages and resolved team issues
- Bridged the gap between the Yearbook team and other stakeholders
- Created the yearbook cover and additional pages
- Sold every copy of the yearbook

Education

Digital Experience Design & Technology — B.S (in progress)

University of Maryland • College Park, MD • Fall 2016 to December 2018

Design, Cultures, and Creativity, Sigma Alpha Mu fraternity

At UMD, I've taken an alternative approach to my education. During my internship with the American Chemical Society, my passion for design and development was reaffirmed — I realized that I not only did I learn more in the field than in class, but I was happier there as well. Since then, I've started my own company. While I'm working on building my business, I'm also pursuing certifications in HTML5, JavaScript, React, and Cloud Development with Amazon Web Services. In the future, I hope to return to the University to create my own major, Digital Experience Design & Technology, via the independent study program. I intend to incorporate design, development, advertising, and communication courses.

Relevant courses: CMSC131 & 132 (Object-Oriented Programming), IDEA258Z (Special Topics in Innovation: Digital Product Design)

Certifications

HTML5 Specialist — (in progress)

Udemy • Online • September 2019 to October 2019

Taught by Framework Television, the HTML Authoring Certification course qualifies developers to create production-ready HTML5 code.

Skills:

- Web page development with HTML5
- Application of all major HTML5 tags
- Fundamentals of CSS3
- Page layout with HTML5 and CSS3

JavaScript Specialist — (in progress)

Udemy • Online • September 2019 to October 2019

Taught by Framework Television, the JavaScript ES6 Certification course qualifies developers to create modern, production-ready JavaScript code.

Skills:

- JavaScript syntax, style, and usage with a focus on developing apps
- Promises, Classes, and Arrow Functions
- ES6 syntax and usage
- Integration of JavaScript with HTML5 Code for Web Applications
